

My neighbors and my friends are very concerned about the continuous loss of independent stations accross America. This proposal to remove access to our radio airwaves has not been vetted to the public and is an act of stealth, led by the same corporate groups that have dumbbed down most stations for their greedy bottom lines. Please do not permit this to occur. We need more independent radio, not less. Is the fox guarding the henhouse here. Who is supposed to protect the rights of the public to the public airwaves???? Next election, you're going to hear from me and my neighbors if this proposal goes through. Bet on it!
